# Field Roller

## **MK MARTIN FIELD ROLLER**

The MK Martin Field Roller, engineered to effectively pack and level your field surface, protecting your equipment from large rocks, and achieving optimal seed-to-soil contact. MK Martin builds for strength and performance. Unlike many field rollers, the MK Field Roller is built with an impressive half-inch thick rolled steel to form the drum. This additional thickness protects the drum from damage while rolling over larger rocks as well and ensuring superior weight per square foot for effective field preparation. Additionally, the MK Field Roller is built with a 3" diameter drum roller shaft. Easy transition from transport to field with the innovative forward fold design, allowing an effortless setup.

**1/2" THICK DRUM**

**34' - 46' WIDTHS**

**36" DRUM DIAMETER**

**FORWARD FOLD DESIGN**

**MUD SCRAPER**

**NARROW TRANSPORT WIDTH**

**3" DRUM SHAFT & BEARING**
