EQUIPMENT FOR RURAL PROPERTY CARE

Gravity Box

The MK Gravity Box comes in four models made available with optional extensions. Ranging from 320-1200 bushel capacities, we have the perfect sized Gravity Box for your operation.

Available on the proven running gear from Horst Wagons, or as a box-only model to place on your own wagon, you can rest easy, knowing that the MK Martin Gravity Box is going to get your load to its destination.

WAGON OPTIONS

Part #	Description
horstWA-BR2WDI	Brakes
horstWA-SBD	Spring Balancer (Double)

Unloading Door

Each Gravity Box comes with an easy to use unloading door equipped with a metering door, providing a smoother, more consistent flow of material. It also allows you to fine tune the amount of material leaving the Gravity Box ensuring that you're in control of the flow every time.

Front Ladder

The front ladder has a slightly angled incline for easier climbing, allowing you to look inside the Gravity Box with less effort and more stability.

Sight Windows

Conveniently located beside the unloading door, these viewing windows allow you to see the current level of material inside the Gravity Box.

Road Lights

Every Gravity Box comes equipped with road lights for safer road travel.

OPTIONS

Rear Ladder

The optional rear ladder gives another access point for operators to look into the Gravity Box.

Grain Shield Tarp Kit

The Grain Shield Tarp Kit is a ratchet-free locking system that not only protects the contents from blowing away and from inclement weather, but also locks quickly and easily so you can head out sooner.

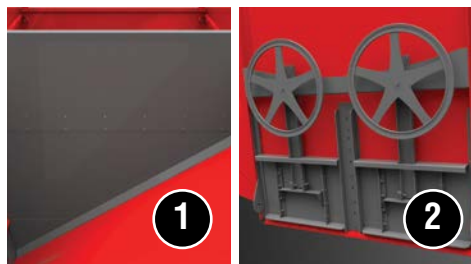

**Comes standard on MKGW12000 model.*

Hydraulic Door

The optional Hydraulic Door allows you to conveniently control the metering of the material using a remote from your tractor.

Divider

Unavailable on MKGW12000 model

The optional divider splits your Gravity Box (1), allowing for two separate commodities to be in the box at the same time. Each side also has its own door for individual unloading and metering (2).

Unloading Auger

Adjustable hopper attaches to the exit door. Available in either stainless or black powder coated down spout.

Center Dump

The optional center dump directs the unloading material beneath the gravity box, ideal for when the unloading area isn't wide enough for standard side dumping.
